First edition: January 2018

CREATING BODY MOVEMENTS

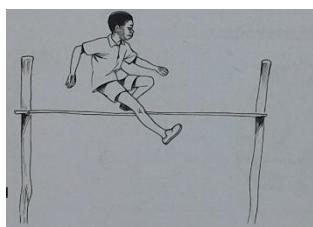

Body movements help in the coordination of muscles and joints.

Body movements can be done through physical exercises such as: jumping, chopping wood and other activities.

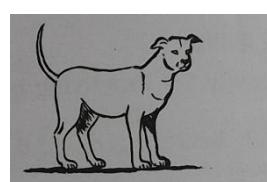

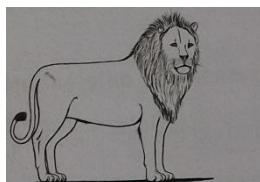

IMPORTANCE OF MOVEMENT AT DIFFERENT HEIGHT LEVELS

- looking for food
- running away from danger
- looking for shelter
- looking for mate for companion and procreation
- looking for fun and pleasure
- seeking peace and freedom
- hiding from a predator
- crawling to catch a prey

PRACTISING BODY MOVEMENTS AT DIFFERENT HEIGHT LEVELS

IMITATING ANIMAL MOVEMENT AT DIFFERENT HEIGHT LEVELS

CREATING ARTISTIC SHAPES AND MOVEMENTS

One can create different shapes and movements when drawing pictures and illustrations.

Such drawings can be done by joining lines and circles.

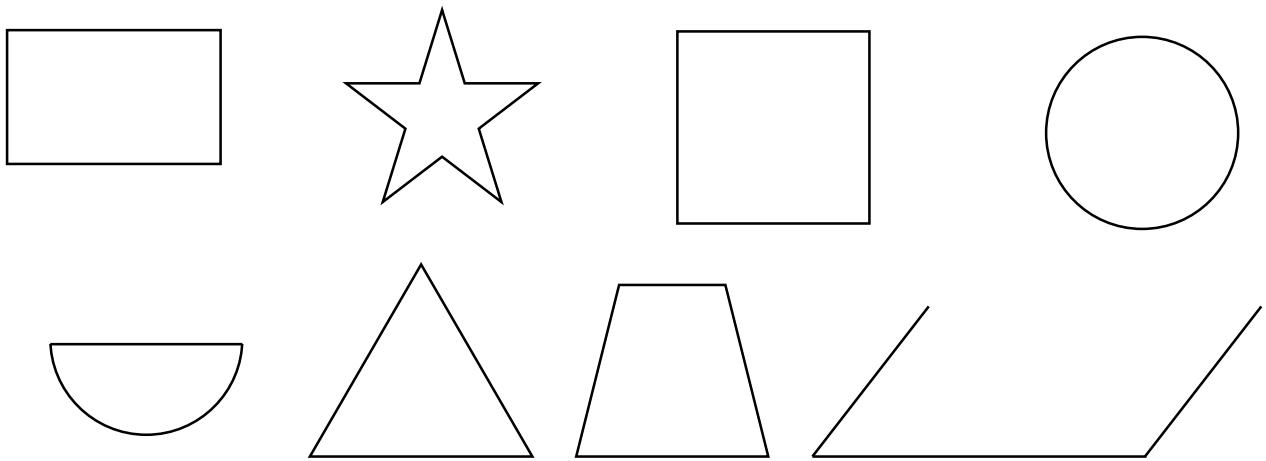

Lines and circles can produce shapes when they are joined in different ways and at different angles.

These shapes are known as geometrical figures and they can be in the form of circles, rectangles, squares and many others.

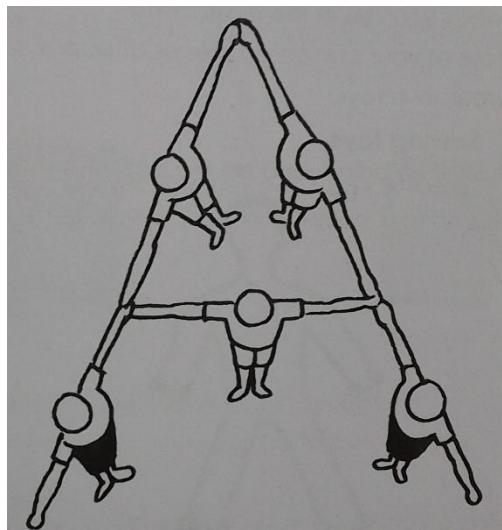

One can also create shapes by knitting and sewing.

When these shapes are joined together in different ways and at different angles, they can make figures such as people, houses, trees, animals and other things.

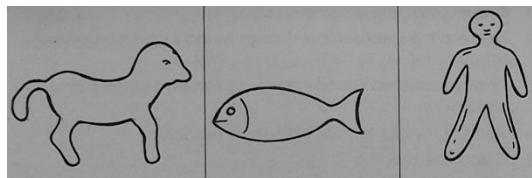

DRAWING GEOMETRICAL SHAPES

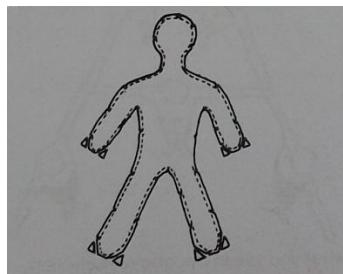

CREATING SHAPES USING THE BODY

DESIGNING TOYS OF DIFFERENT SHAPES

SEWING TOYS

Steps for sewing and stuffing toys

- lay the designs on pieces of fabric and pin them together
- cut out the pattern pieces
- mark the stitching line
- mark the features on the toy and position of an opening to be used for stuffing
- tack and stitch using a running stitch, leaving an opening for stuffing
- clip and snip seams where necessary and turn the toy to the open side
- stuff the toy and close the opening by over-sewing the opening

KNITTING TOYS

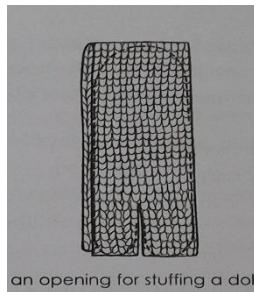

A BEAN BAG

- cast on 48 stitches
- using garter stitches, knit until the work measures 16cm long
- cast off
- fold and join the sides using the running stitch
- stuff and over-sew the opening

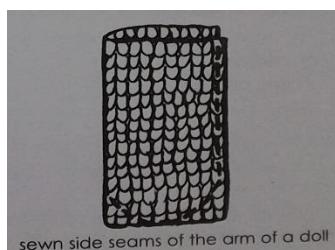

A KNITTED DOLL

- cast on 10 (8, 6) stitches and knit in garter stitch until the work measures 11 (7, 5) cm long (this forms the leg)
- knit another leg to match
- knit the body using the following steps
 - ★ with both legs on one needle, knit right across to join them together
 - ★ carry on knitting until the work measures 35 (25, 19) cm long. this will be the front, head and back
 - ★ divide the stitches in half for the back of the legs
 - ★ using half of the stitches, knit until the work measures 11 (7, 5) cm long and then cast off

- ★ re-join the wool to the remaining half of the stitches; knit half of the stitches and knit the second leg to match
- knit the arms using the following step
 - ★ cast on 16 (14, 12) stitches and knit in garter stitch until work measures 7 (5, 4) cm long.
 - ★ cast off
 - ★ knit another arm to match
- make up (finish off) the toy by folding the knitted work in half and over-sewing round the edge leaving space for stuffing as in the illustration below

- ★ round off the ends of the legs for feet and head by doing the following
- ★ turn the knitted doll inside out
- ★ stuff the head firmly and then tie it tightly round the neck with a piece of wool
- ★ stuff the rest of the body and legs and sew up the opening
- ★ sew up the side of the arms and round off the corners for hands, as shown below

- ★ turn the arms inside out and stuff them
- ★ sew the arms on the body at the shoulders
- ★ embroider the features of the doll (eyes, nose and mouth)

IMPORTANCE OF MAKING TOYS BY CHILDREN

- Making toys helps the children in developing their creativity
- Making toys helps children in developing their imagination

CREATING GAMES USING TOYS

There are many games that can be played using toys.

RISKS AND SAFETY PRACTICES IN ARTS AND SPORTS

Risks in Using Equipment

The table below shows sources of risks in various sporting and artistic activities

ACTIVITY	SOURCE OF RISKS
Weaving	Equipment such as bamboos and chisongole
Knitting	Equipment such as knitting needles
Sewing	Equipment such as sewing needles and pressing iron
Carving	Tools such as adzes (kasemasema)
Athletics: track events (running activities. For example, relay race and cross country)	Small running lanes, stones, litter, sharp objects, bricks, rough surfaces, lack of warm up and cool down activities
Athletics (throwing events) for example, javelin, discus, shot put	Poor condition of equipment, poor handling of equipment and slippery and rough surfaces
Ball games	Sports surfaces in poor conditions, lack of warm up and cool down activities, wrong pressure and size of balls, poor condition of balls

Strategies for Reducing Risks

- Doing warm ups and cool downs
- Thrower should always be in front of others
- Clear the area where the activity will be done
- Always use equipment that is in good condition
- Store and keep equipment safely after use to prevent wrong use
- Proper handling of sharp tools, for example, needles
- Wearing a thimble when sewing
- Proper sharpening of tools
- Splitting and processing bamboos with care in weaving

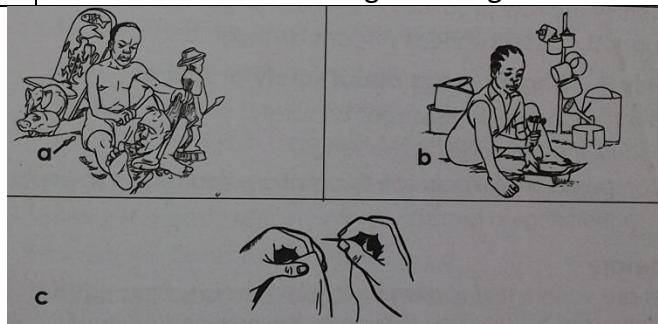

The table below shows strategies that can be used to reduce risks

ACTIVITY	RISKS	STRATEGY THAT CAN BE USED TO REDUCE RISKS
Playing ball games	Getting fractures, cuts and scratches	<ul style="list-style-type: none"> - Referee should control the game - Referee should give penalties for bad play - Plant grass on bare ground - Remove anthills and stones from the ground - Fill ditches and holes on the ground
	Ball hitting players	<ul style="list-style-type: none"> - Cut all grass for the balls to run smoothly - Goalkeepers wearing protective wear - Make the ground flat
	Players hitting each other	<ul style="list-style-type: none"> - Strictly observe the rules of the game
Sewing	Needle pricking ones finger	<ul style="list-style-type: none"> - Use a thimble to protect the middle finger when sewing
	Needle pins piercing others or oneself	<ul style="list-style-type: none"> - Put pins or needles on a pin cushion - Point the needle towards your own body when sewing
	Cutting oneself or others	<ul style="list-style-type: none"> - Cut away from others - Handle scissors or razor blades properly
	Burning oneself or others	<ul style="list-style-type: none"> - Put pressing iron on a stand after every pressing - Remove charcoal after use - Switch off and plug off the electric iron after use - Proper storage
Athletics	Hitting one another due to bunching (many people being together without enough personal and general space)	<ul style="list-style-type: none"> - All races of one lap for example: 100m, 200m should be run in lanes - Runners should be well spaced and limited in number - Obey the rules
	Collapsing	<ul style="list-style-type: none"> - Breathe through the nose when running - Do cool down activities
Carving	Getting cuts or tears	<ul style="list-style-type: none"> - Sharpen equipment away from your body - Place tools in safe places - Hold tools firmly when sharpening them

The table below shows some of safe practices in different activities

ACTIVITY	SAFE PRACTICES
Javelin	<ul style="list-style-type: none"> - Walk with the javelin in vertical position to the playing field - Put a cork or a protective cloth on both ends of the javelin when not in use
Discus	<ul style="list-style-type: none"> - Use discus without cracks and worn out reams - Create adequate space between thrower and others

The shot	- Hold the shot with a firm grip
Jumping events	- Have a soft landing area
Athletics	<ul style="list-style-type: none"> - Adequate preparation - Use lanes when running - Ensure learners are well spaced in races of more than one lap - Count all learners before and after long runs - Provide transport behind the runners in long distance running
Basketball	- Minimise contacts among players
Netball	<ul style="list-style-type: none"> - Observe rules of the game - Umpires should ensure fair play
Volleyball	<ul style="list-style-type: none"> - Playing field should be dry - Use approved balls - Avoid treading on the ball - Spikes should be empty part of the court
Field hockey	<ul style="list-style-type: none"> - Cut grass on the pitch - Provide goalkeepers with protective clothing - Use sticks that are in good condition
Football (soccer)	<ul style="list-style-type: none"> - Avoid dangerous play - Referees should be strict in the game - Cut grass on the field of play - Ensure the field is free of risks
Gymnastics	<ul style="list-style-type: none"> - Use clothing that allows free movement - Proper supervision of the activities - Give activities according to the age of the learners

UNIT 2 PARTICIPATING AND COLLABORATING IN SPORTS AND ARTS

Sports and artistic performances

There are different types of sports and arts in which learners can participate.

These include: football, netball, singing, dancing, and poetry.

The activities can be done for pleasure, leisure or entertainment.

FOOTBALL

Football is played for pleasure and entertainment.

IMPORTANCE OF PARTICIPATING IN FOOTBALL

- It fosters team spirit
- It promotes cooperation

BASIC SKILLS IN FOOTBALL

- Dribbling
- Passing
- Heading
- Shooting
- Goal keeping

NETBALL

Netball is played for pleasure and entertainment

IMPORTANCE OF PARTICIPATING IN NETBALL

- It fosters team spirit
- It promotes cooperation

BASIC SKILLS IN NETBALL

- Passing
- Catching
- Marking
- Shooting
- Goal keeping

The learners need to practice the basic skills first in both football and netball before participating in a real game.

Both games need cooperation and team spirit if they are to be played successfully.

SINGING

Singing is a form of communication.

Songs can be used to pass on messages on issues such as health and gender.

Songs are an effective medium of communication because they easily draw the attention of the audience.

DANCING

Dancing is one of the oldest human activities.

In Malawi, some dances are based on specific historical events. For example, Beni is based on the parades of British soldiers, ngoma or Ingoma is a war dance.

Tchopa and Likhuba are traditional dances associated with rain-making ceremonies.

SPORTS ATTIRE AND COSTUMES

Sports attire and costumes are the type of dress that identifies people with a certain kind of sporting activity or artistic performance.

Sports attire and costumes can be made using locally available materials.

This can give an opportunity to the makers to acquire various skills such as designing, creativity and production of various items

Once the sports attire and costumes have been made, there is need to take care of them.

This can be done through proper storage so that the items can be used many times before they wear out.

IMPORTANCE OF SPORTS ATTIRE AND COSTUMES

- Giving identity
- Adding beauty
- Allows freedom of body movement
- Attracting viewers

ARTISTIC ACTIVITIES THAT REQUIRE COSTUMES

- Drama
- Poetry (poem recitals)
- Story telling
- Traditional dance
- Choir singing

LOCAL MUSICAL INSTRUMENTS

A musical instrument is an instrument created or adapted to make musical sounds.

In principle, any object that produces sound can be considered a musical instrument.

Local musical instruments can be classified into:

- a) Tuned musical instruments
- b) Untuned musical instruments

Tuned musical instruments are those which produce various pitches.

Examples of tuned musical instruments are Nkangala, the flute, string-bass and guitar.

Untuned musical instruments are those which produce one pitch.

Examples of untuned musical instruments are shakers, rasps and rattles.

OCCASIONS WHEN MUSICAL INSTRUMENTS ARE USED

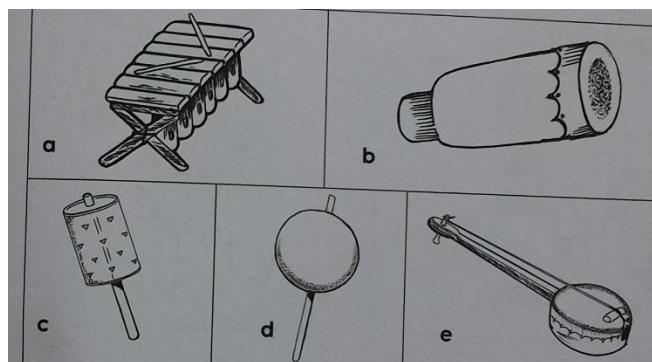

- Weddings
- Funerals
- Initiation ceremonies
- Political gatherings
- Festivals
- Installation of chiefs

SOME MATERIALS FOR MAKING MUSICAL INSTRUMENTS

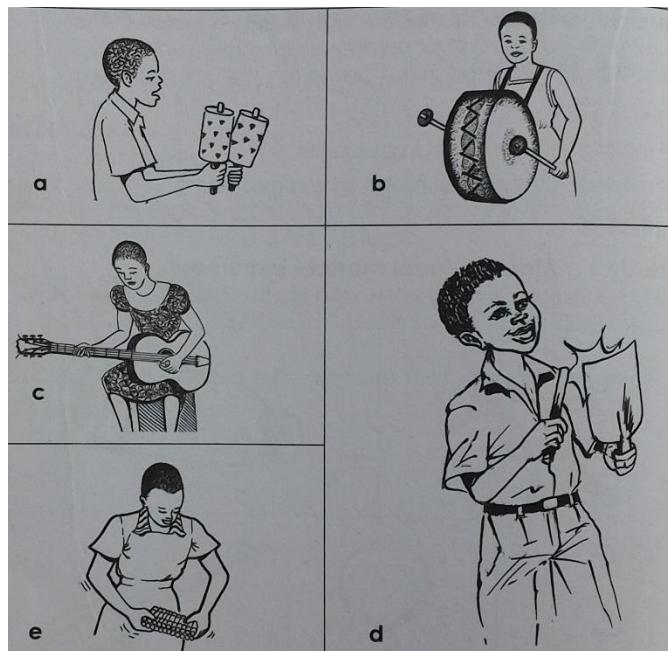

- Gallons
- Plastic papers
- Buckets
- Sticks
- Wood
- Strings
- Bones
- Bamboo
- Reed

- Nails
- Wires
- Animal hides

MAKING LOCAL MUSICAL INSTRUMENTS

PLAYING MUSICAL INSTRUMENTS

Musical instruments can be played by:

- ★ Plucking (e.g a guitar and banjo)
- ★ Beating (e.g a drum)
- ★ Blowing (e.g a trumpet)
- ★ Shaking (e.g a rattle)
- ★ Pressing (e.g a piano)
- ★ stroking

IMPORTANCE OF MUSICAL INSTRUMENTS

- they complement human voice
- they add harmony in music
- they reflect the cultural history of an ethnic group
- they attract attentiveness and concentration of the musical players and listeners
- they foster self-expression
- they relieve stress
- they add beauty in music
- they promote social skills
- they boost listening skills
- they promote discipline

UNIT 3 SELF EXPRESSION THROUGH ARTWORK

There are various artworks which learners can produce to express and communicate their feelings.

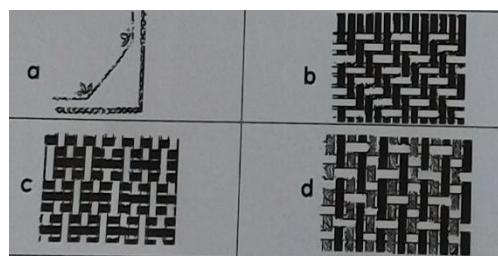

These include songs, sports, stories, sewing, knitting, plaiting and modelling.

REPETITIONS AND CONTRASTS IN ARTWORK

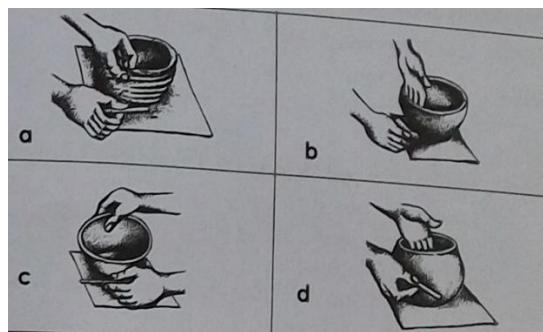

Repetitions and contrasts in these artworks are used in order: (Importance of repetitions and contrasts)

- i) To express and communicate various ideas effectively
- ii) To emphasize certain ideas
- iii) To make certain areas of an artwork stand out
- iv) To add beauty to artworks
- v) To express feelings
- vi) To add visual intensity and interest to art pieces

REPETITIONS AND CONTRASTS IN ART AND CRAFT

MODELLING A POT

FORMS OF COMMUNICATION THROUGH ARTWORK

Communication is passing out information, ideas, feelings or wishes from one person to another.

Communication can be verbal or non-verbal.

Songs, plays, cartoons and puppets can be used to communicate verbally or non-verbally.

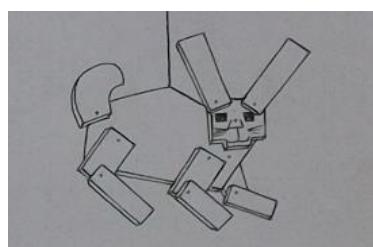

SINGING

DRAWING CARTOONS

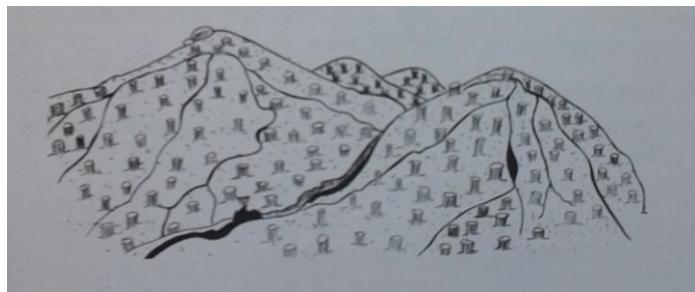

MAKING PUPPETS

UNIT 4 SOLVING CHALLENGES IN EVERYDAY LIFE

CHALLENGES IN EVERYDAY LIFE AND THEIR SOLUTIONS

CHALLENGES IN LIFE

- Floods
- Droughts
- Epidemics
- Rapid population growth
- Diseases
- Food shortages

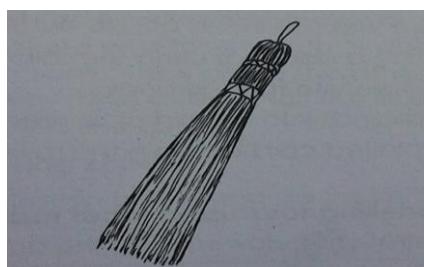

Artistic representations such as plays and posters can be used as a way of dealing with these challenges.

POSSIBLE SOLUTIONS TO THE CHALLENGES

- Practising family planning
- Planting more trees
- Using environmental friendly methods of farming
- Doing physical exercises
- Eating balanced diet food
- Living a healthy life

UNIT 5 PRODUCING VARIOUS ITEMS FOR THE COMMUNITY

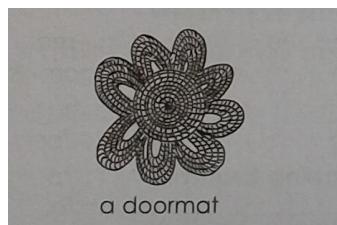

WEAVING BROOMS

Guidelines for weaving brooms

- a) prepare dry palm leaves into thick edged weaving strips by using a knife
- b) get a bundle of the thick edged strips and tie in the midpoint
- c) bend the strips from the midpoint towards one side
- d) tie at two or more places to make a handle and a sweeper
- e) weave through the ties with palm leaf strips
- f) trim the ends of the strips with a sharp knife

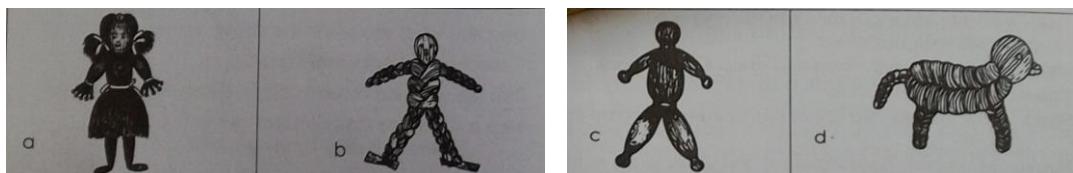

PLAITING DOORMATS

Guidelines for plaiting doormats

- a) arrange the fibre into three strands
- b) plait the strands into a plaid of desired length
- c) coil the plaited cord and join the rows using running stitches

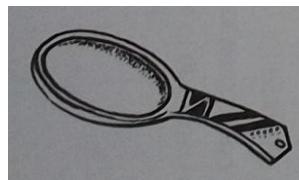

MODELLING TOYS USING LOCAL MATERIALS

Guidelines for modelling grass toys

- a) Shred maize sheaths/palm leaves into small pieces lengthwise using a knife.
- b) tie the bottom end of the maize sheaths/palm leaves firmly to form a broom-like structure
- c) fold the longer end over the tied end, as is done when weaving brooms, to form the head of the toy
- d) after all the maize sheaths/palm leaves have been turned down, tie again to form a neck
- e) Pull out some maize sheaths/palm leaves into three groups and plait for a length of about 10cm to form a trunk. Then divide them into two groups to form legs (hind limbs). Plait the legs and do the same with the arms.

CARVING SPOONS

Guidelines for carving spoons

- a) take a piece of wood and chop it into a plank
- b) smoothen the plank
- c) draw the required size of the wooden spoon on the plank
- d) use an adze (kasemasema) and chisel to carve the spoon
- e) smoothen the spoon using a broken piece of glass or a sharp knife

COSTING ITEMS

When costing items consider the following:

- The materials used
- The cost of materials used
- Time it took to make the items
- Labour involved in making the items
- Size of the items
- Quality of the items
- Demand of the items
- Supply of the items
- Affordability of the customers

MARKETING ITEMS

Importance of Carrying out a Market Research

- To understand what people's likes are
- To discover where particular artefacts are popular
- To convince people that they will not regret after buying the artefacts

Marketing Skills

- Carrying out a research
- Costing the artefacts
- Displaying them
- Marketing them

UNIT 6 VARIOUS ARTISTIC ACTIVITIES

PRODUCING AND MARKETING ART ITEMS

There are many artistic activities which can help one to develop skills for producing and marketing artistic items.

Some of these activities are composing songs, acting, drawing, sewing and knitting.

COMPOSING A SONG

Guidelines for composing a song

Step 1 What message do you want to convey in the songs

Step 2 Target audience

Step 3 What mood of the song do you want to convey your message through?

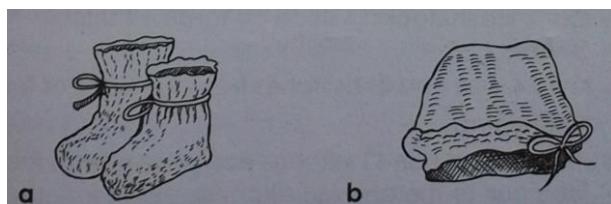

Step 4 Identify a time for your song

Step 5 Find words to the tune of your song (consider things such as rhymes in your words of the time, just like in poetry)

FACTORS TO CONSIDER WHEN COMPOSING A SONG

- Age of the target group
- Cultural background of the target group
- Religion of the target group
- Language spoken by the target group
- Likes and dislikes of the target group

KNITTING A BABY'S BOOTIES AND BONNET

PATTERN FOR KNITTING THE BONNET

MATERIALS

- 1 ball yarn of 50gm

- No. 3.5 mm sized needles

PATTERN

- a) cast on 82 stitches
- b) 1st row: knit
- c) 2nd row to 10th row: purl
- d) 11th and alternate row: purl
- e) 12th and every alternate rows to form stocking stitch
- f) continue in stocking stitch until the work measures 17cm long from the beginning
- g) fold the bonnet in half with a wrong side out
- h) using the over-sewing, stitch, join the sides
- i) make a hem from one end of the bonnet to the other across the stitched seam for the chord
- j) using four strands of knitting wool, twist a chord to be slotted in the hem

PATTERN FOR KNITTING THE BOOTIES

- a) cast on 36 stitches
- b) 1st row to 10th row: knit
- c) 11th to 20th row: stocking stitch
- d) 21st row: k1, wfd k2 together*, repeat from * to * to the last stitched, knit
- e) 22nd row to 25th row: knit
- f) 26th row: k25 stitches and turn
- g) 27th row: purl 14 stitches and turn
- h) continue in stocking stitch on these 14 stitches for 20 rows
- i) knit 14, purl and k11 stitches from the sides of foot
- j) knit to end
- k) pick up and purl stitches from one side of the foot; purl to the end (58 stitches)
- l) work 10 more rows in garter stitch
- m) cast off all stitches
- n) using oversewing, join the two sides on the wrong side
- o) using 4 strands of knitting wool, twist a chord to be slotted in the holes provided in the booty

ABBREVIATIONS IN KNITTING

C/on - cast on

C/off - cast off

Sts - stitches

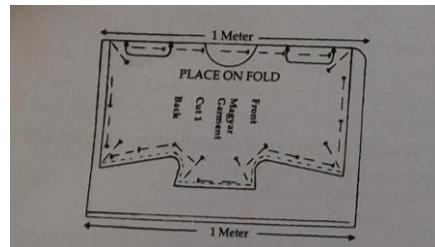

k - knit

p	-	purl
Wrd	-	wool forward
tog	-	together
alt	-	alternate
St st	-	stocking stitches
beg	-	beginning
incl	-	including
rep	-	repeat
to	-	beginning from - to -

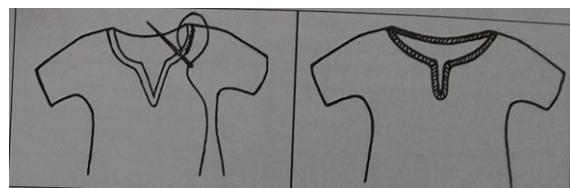

SEWING A MAGYER DRESS/COLLARLESS MAGYER SHIRT

Process for constructing a Magyer dress/collarless Magyer shirt

- a) pre-shrink cotton fabric and hang out to dry
- b) pull all corners of the fabric diagonally to straighten the fibre. Press with an iron
- c) lay out the fabric with the wrong side out and place pattern on the fabric
- d) pin pattern piece to fabric and cut 1 piece of the garment as in the following illustration

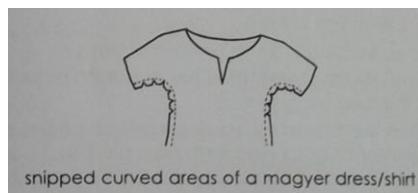

- e) assemble the garment by making a slash opening 10cm long in the centre of the neckline
- f) cut out crossway strips and join them. place the right sides of the crossway strip along the neckline using back stitch
- g) trim one side of the seam allowance to remove the bulk of the finished binding
- h) snip the curved edge close to the stitching line to relieve strain
- i) turn the binding over so that it shows equally on both sides as shown in the illustration below

- j) tack the binding down and hem in position on the wrong side, picking up the back stitches
- k) bind the sleeves using the same procedure as in Step e) above

- i) work side seams by making open seams on both sides of the garment. Stitch using the back stitch
- m) snip the curved areas as illustrated below

- n)neaten the seams
- o) turn a small fold at the bottom of the garment and press. make a second fold for the hem of about 2cm. Hold down the hem using hemming stitches

ATTACHING A BUTTON

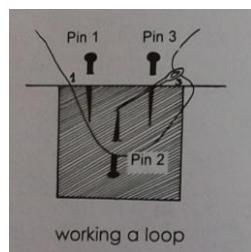

Procedure for attaching a button to the shirt or dress

- a) attach a button to the garment by fastening a piece of thread at the required position of the button
- b) place the centre of the button over the fastened thread, and bring the thread through the first hole to the right side of the button
- c) place across the button, a pin, match stick or knitting needle according to the length
- d) pass the thread across the pin and through the second hole to the back of the fabric
- e) repeat this as often as necessary for the size of the button, keeping the stitches on the wrong side, one lying over the other
- f) remove the pin, bring the needle out between the button and the fabric. pull the button to the end of the long stitches formed
- g) wind a thread 3 to 4 times round the stem of stitches formed. Take the needle through the back of the fabric, loop over the stitches and fasten off.

WORKING A LOOP

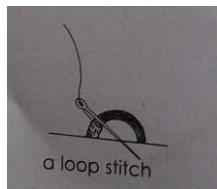

STEPS TO MAKE A WORKED LOOP

- 1) measure the diameter of the button to mark the place of the loop using pins
- 2) fasten the thread with a double stitch at one pin and work strands back and forth from pin 1 to pin 3 passing the thread round pin 2 and finishing at pin 3 as illustrated below

- 3) repeat stranding as often as the size of the loop requires

- 4) remove the pins
- 5) turn the loop round and work the loop stitches over the stranded threads as illustrated below

CUTTING AND ATTACHING A SIMPLE APPLIQUE PIECE

Cutting

Step 1 Trace or draw desired shapes on paper

Step 2 Cut around the outlines to get the pattern of the required design

Step 3 Trace out the design on the contrasting colour of fabric

Step 4 Cut neatly along the outline

Step 5 If a motif is cut from the printed fabric, cut it following the edges of the chosen design

Attaching

Step 1 Place the cut out design in position on the right side of the garment. Pin and tuck

Step 2 Using hemming stitches, stitch closely along the edge of the applique

Step 3 Remove the tucking

Step 4 Press the garment and air it

Step 5 Prepare price labels for the garments constructed

Step 6 Attach the price labels to the garments

Step 7 Display and mock market the garments
